

MOBILE EVAPORATIVE COOLER

The mobile evaporative cooler is a standalone unit which provides strong airflow, operates with low power requirements and is a great affordable option for cooling marquees, events, factories, warehouses or anywhere a standalone unit is required.

For maximum efficiency we recommend placing the air conditioner in an open doorway or in front of an open window to ensure plenty of fresh air. Distribute the air over the area to be cooled and vent it to outside through a suitable opening.

FEATURES

- Six Speed Fan control
- Cool OR Fan Only option
- 100L water tank for extended operation
- Can be connected to a garden hose
- Easy Installation
- Will cool large open spaces

Specifications

Model	MEC.COO.1
Power Supply	240V
Current Consumption	5.6A
Power Connection	3pin 10amp plug

Weight (kg)	95
Dimensions (mm)	1130x1220x1540
Water Tank Capacity	100 L
Air Flow- Evaporator	18,500m3/hr

RACE Hire offer complete design, installation and commissioning on their range of equipment, to ensure your job or event runs smoothly to your requirements.

Is on-site power is an issue? We can design and supply that to, from generators, cable and distribution gear to electrical connection's by our qualified electricians.
