

MOBILE EVAPORATIVE COOLER

The mobile evaporative cooler is a standalone unit which provides strong airflow, operates with low power requirements and is a great affordable option for cooling marquees, events, factories, warehouses or anywhere a standalone unit is required.

For maximum efficiency we recommend placing the air conditioner in an open doorway or in front of an open window to ensure plenty of fresh air. Distribute the air over the area to be cooled and vent it to outside through a suitable opening.

FEATURES

- Variable Speed Fan control
- Cool OR Fan Only option
- 300L water tank for extended operation
- Can be connected to a garden hose
- Easy Installation
- Will cool large open spaces

Specifications

Model	MEC.COO.3
Power Supply	240V
Current Consumption	5A
Power Connection	3pin 10amp plug
Cooling Area	Up to 150m ²

Weight (kg)	100
Dimensions (mm)	1070x1070x1650mm
Water Tank Capacity	300 L
Air Flow	5000 L per second
Noise	<70dBa

RACE Hire offer complete design, installation and commissioning on their range of equipment, to ensure your job or event runs smoothly to your requirements.

Is on-site power is an issue? We can design and supply that to, from generators, cable and distribution gear to electrical connection's by our qualified electricians.
